

## Trucolor

### IRON OXIDE

**Description:** *Trucolor* is a blend of iron oxide pigments and various admixtures to provide a streak free coloring system for micro toppings as well as any other cementitious product.

**Recommended For:** *Trucolor* provides integral coloring for any cementitious based product. Colors can be combined to create an unlimited range. Specifically designed to work with any *Technik Decorative Concrete* product.

**Integral Coloring:** When using *Trucolor* always disperse pigments into *Primeactive* or water prior to adding cementitious powder. This process will allow for greater color consistency. Mix *Trucolor* for 5 seconds to fully disperse. It is recommended to do a test area prior to starting your project to ensure the color meets your expectations.

**Coverage:** *Trucolor* is available in 5 kg (11lbs) pails. Coverage is based upon the desired color intensity and can vary considerably. 1 pail contains approximately 17 cups of *Trucolor*. You can use as little as you wish. Please refer to the chart below for maximum load limits

Product	Recommend load range	Maximum load
Multicoat Reg.	1/8 to 3 cups	6 cups
Multicoat Fine	1/8 to 3 cups	6 cups
Multicoat X-fine	1/8 to 3 cups	6 cups
Stamp Top	1/8 to 3 cups	6 cups
Micro Top	1/8 to 3 cups	6 cups
Trowel Down	1/8 to 3 cups	6 cups
Counter Top	1/4 to 4 cups	8 cups
Kast Krete	1/4 to 4 cups	8 cups

Exceeding the upper limit of the recommended range will not dramatically enhance the color of your finished project. The “maximum load” is the most color you can put into your project before adversely affecting the final strength.

For items not listed please contact Starpatch Concrete for maximum load limits.

**Caution:** Contains various polymers and other additives which may cause skin irritation. In case of skin or eye contact, wash thoroughly with water. Please consult the MSDS for detailed safety and handling instructions. In case of eye contact consult with nearest physician.  
**KEEP OUT OF REACH OF CHILDREN.**
