Colour Matching

Starpatch Concrete Products proudly offers the following services:

- **Colour Matching** – Did you just pour coloured ready mix and need to do some repairs? We can blend any of our repair products with the required colour to match your pour! We stock the Solomon line of iron oxides and have correlation charts to match other iron oxides as well.
- **Custom Colour Development** – Are you trying to repair old weathered concrete? Can't remember what colour was used in a pour from years gone by? We can colour match almost any old concrete colour – just bring us a chip of the concrete.
- **Decorative Colour Development** – Contact us to help develop the exact colour you want for your decorative floor, countertop or fireplace.
- **Small Orders Welcome** – We can make as little as one unit of any given product you want colour matched. Please contact us directly for details.
